

Agri-Science and Ola FFA

The National FFA Organization is dedicated to making a positive difference in the lives of young people by developing their potential for premier leadership, personal growth and career success through agricultural education.

Our goals at Ola High School are to continue the efforts of the National FFA at the high school level and provide students a place to further their education in agriscience.

You might be surprised at the diversity of opportunities offered through our agriscience program, FFA and the dynamic agricultural industry, which employs more than 20 million Americans. People who are not familiar with the program may think that agricultural education is only for those interested in production agriculture. Nothing could be further from the truth! Agriculture is a thriving industry full of cutting edge careers in science, business and technology. Students who take courses in the Ola Agriscience Program will become aware of many career opportunities in agriscience, including veterinary science, international marketing, computer programming, biotechnology and genetic engineering. Our agriscience program teaches theory and offers scientific laboratory practice. In our program students learn valuable problem-solving and analytical skills that are critical for success in education and careers.

Consequently, this supports one of the goals of the program which is to help students improve their skills in science and math through fun and engaging activities and lessons that pertain to agriculture and the environment.

The Ola Agriscience Program will also provide students with many opportunities to develop leadership, personal growth, and career success through leadership education and participation in the Ola FFA Chapter. Students enrolled in agriscience can also be FFA members, and in the FFA there are ample areas in which

everyone can excel. The following is a sample list of some of the Career Development Events, conferences, workshops, and projects students can participate in as members of the Ola FFA Chapter: Agriscience Fair, Supervised Agricultural Experience Program, Ag Communications, Ag Sales, Public

Speaking, Nursery Landscape, Floriculture, Environmental and Natural Resources, Business Management, Job Interview, National Convention, State Convention, Greenhand Jamboree, Summer Camp...and many more opportunities for involvement.
