

AT&T Choice Dilemma

I recently received in the mail a promotion from AT&T. They described 3 different plans I could choose for my long distance telephone service. Determine the number of minutes of long distance phone calls I have to make a month for each plan to be cost effective. Here are the choices:

- All long distance phone calls for 7 cents a minute.
- All long distance phone calls for 5 cents a minute plus \$3.95 a month.
- All long distance phone calls for \$19.95 a month.
